PROFESSIONAL SUMMARY

Entry level Cybersecurity professional with an HND in Cybersecurity and Networking, holding industry certifications including CCNA, MCSA, and a Certificate in Ethical Hacking. Experienced in security monitoring, threat detection, vulnerability assessment, incident response fundamentals, and log analysis. Skilled in Windows Server administration, Active Directory, Linux system administration, network configuration, and cloud computing fundamentals. Currently preparing for the Microsoft SC-200 Security Operations Analyst certification. Seeking a Cybersecurity Intern position to apply technical knowledge and grow within a professional security environment.

KEY SKILLS

Security and SOC Operations

- Security monitoring and incident response fundamentals
- Threat detection, vulnerability identification, and risk awareness
- Log analysis and querying using KQL (Kusto Query Language)
- Ethical hacking techniques including reconnaissance, scanning, and vulnerability exploitation
- Simulated incident response and security event analysis

Networking

- TCP/IP, DNS, DHCP configuration and troubleshooting
- LAN/WAN setup, routing, switching, and firewall fundamentals
- Network connectivity diagnostics and fault resolution

Systems Administration

- Windows Server and Active Directory: user accounts, group policies, DNS, and DHCP management
- Linux system administration, user permissions, service management, and basic system hardening
- Windows OS (7/10/11) clean installation, configuration, and troubleshooting
- Linux OS installation, desktop and server environment setup
- Blue Screen of Death (BSOD) diagnosis, root cause analysis, and resolution

Cloud Computing

- Foundational understanding of cloud service models: IaaS, PaaS, and SaaS
- Awareness of cloud security principles, shared responsibility model, and access management
- Familiarity with cloud networking concepts including virtual networks and cloud-based identity services

Scripting and Tools

- PowerShell and Bash scripting for automation and system administration tasks
- Windows and Linux command-line interface (CLI) tools for diagnostics and administration
- Hardware diagnostics and troubleshooting

EDUCATION

HND in Cybersecurity and Networking

WinSYS City Campus, Sri Lanka | Graduated: May 9, 2026

2024 - 2026

G.C.E. Ordinary Level (O/L)

G.B. Senanayaka National College, Sri Lanka

2016 - 2024

CERTIFICATIONS

- Cisco Certified Network Associate (CCNA) — WinSYS Networks, October 2024
- Microsoft Certified System Administrator (MCSA) — WinSYS Networks, November 2024
- Certificate in Ethical Hacking (Basic Vocational Skills) — WinSYS Networks, May 2025
- Linux Network Administrator with Security (Basic Vocational Skills) — WinSYS Networks, January 2025
- Certificate in Windows Networks (Basic Vocational Skills) — WinSYS Networks, August 2024
- Certificate in Computer Hardware (Basic Vocational Skills) — WinSYS Networks, July 2024
- Microsoft SC-200: Microsoft Security Operations Analyst — In Progress

PRACTICAL TRAINING AND HANDS-ON EXPERIENCE

- Applied ethical hacking techniques including network reconnaissance, port scanning, and vulnerability identification in lab environments
- Participated in simulated incident response scenarios and security event analysis exercises using industry-standard approaches
- Performed log analysis and monitored simulated security events to identify anomalies and potential threats
- Configured and managed Windows Server environments including Active Directory users, groups, DNS, and DHCP
- Administered Linux systems covering user management, file permissions, and basic system hardening
- Performed network configuration and troubleshooting including IP addressing and LAN connectivity diagnostics
- Installed and configured Windows OS environments including clean installations, disk partitioning, and post-setup optimisation
- Installed and configured Linux OS for desktop and server use cases
- Diagnosed and resolved Blue Screen of Death (BSOD) errors through memory analysis, driver inspection, and hardware testing

LANGUAGES

- Sinhala — Native
- English — Professional Working Proficiency
